

Do not allow cell phone or text messaging use onboard airplanes for reasons of personal space "can you here me know--good" and more importantly to discourage any communication between people who might be trying to command a hijacking. Sleeper terrorists could text others to let them know what's going on around the cabin and this is a serious concern for crewmember's safety. We already are the "safety police" on the aircraft please don't make us the cell phone police too!!
